

## CONTRACTS

Please note:

1. Prices are strictly NET and exclude VAT.
2. The price stated includes for finishing of the ironwork in our standard satin finish black paint. Alternatively, the ironwork can be finished in any colour from the extensive RAL colour range, simply let us know the RAL No. of the colour you would like (subject to a small additional charge).  
Please note that colours are matched as closely as possible but may vary in the same way that branded paints may vary from batch to batch.
3. We reserve the right to review our prices in the event of sizes/quantities varying from those on which our estimate has been based.
4. Our estimate includes for production of drawings for client approval. Any additional drawing time resulting from changes to dimensions or design at the request of the client will be charged accordingly at our current hourly rate of £82.50.
5. Survey and installation is not included unless specifically stated otherwise on the estimate.
6. Structural calculations, if required, are to be undertaken by the customer/main contractor unless otherwise agreed.
7. No allowance has been made for MCD (main contractor discount) retention.
8. Unless otherwise stated, our ironwork is not galvanised as hot dip galvanising can undermine the finish and cause distortion. We can however apply a zinc thermal coating as an alternative to the hot dip process. If you live near the coast or in an exposed location, you may wish to consider this to provide additional protection to the metalwork. Please contact us for further information and a price.

## TIMESCALES

**PLEASE NOTE, DUE TO EXCEPTIONAL DEMAND, WE ARE CURRENTLY WORKING TO LONGER LEAD TIMES THAN THOSE INDICATED BELOW - PLEASE CONTACT US AT TIME OF ORDER.**

Our canopies, porches and verandas are of the highest quality and are all hand made to order. For standard items, our typical delivery time is generally 8 – 14 weeks. These **timescales are offered as a guide only** and will vary dependant on the volume of work in production when the order is placed, the size and complexity of the order and the availability of materials from third party suppliers.
